## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Hane. Hane shows all of the basic device including a distribution tube assembly having a main supply line 7, frame 4, two fluid passageways 2 and 3, adaptor 6, web and valve 16.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-13 and 15-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hane in view of Baker.

Hane shows all of the basic device except for the frame. Baker shows another distribution tube assembly having two passages 18 and a frame 22. It would have been obvious to one of ordinary skill in the art at the time the invention was made

to modify the Hane device to have a frame as taught by Baker to protect the two passages.

5. Claims 14 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hane in view of Baker as applied to claim1 and 16 above, and further in view of Lew.

Hane shows all of the basic device except for a third passageway. Lew shows another distribution tube assembly having a third passageway. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Hane device to have a third passageway to achieve the desire spray coverage.
